

Lesson Design Planning Template

Big Idea What is the big idea that the learner will walk away with at the end of the lesson that is critical for learners at this stage of their learning path?	Learning Outcome(s) What specific things will the learner know or be able to do by the end of the lesson?	Evidence of Learning What does learning look like for this objective? (e.g., accurate performance of a task, correct use of terminology)	Assessments What will learners do to provide evidence of their learning? (e.g., a presentation, a test, a project)	Learning Activities What learning activities will allow learners to acquire and practice the skills necessary to demonstrate their learning and complete the assessment successfully?
1. The importance of having a clean and accurate dataset. 2. Data visualization helps finding patterns, therefore deriving meaningful insights.	1. Learners will be able to visually understand the importance of having clean and organized data visualizations. 2. Learners will be able to transform raw datasets into pivot tables and graphs.	1. Correct use of data visualization tools 2. Performance of a task	A data visualization task using a pivot table and a graph on Google Sheets	1. Learners will participate in a learning academy session that will guide them through the process of data visualization step by step. 2. Learners will be divided into smaller groups to discuss what they have learned during the session and to share how they can potentially apply this skill in their respective departments.
